The comment from the second reviewer is including:

- Penelitian ini tidak menggunakan perhitungan sampel karena tidak diketahui besarnya populasi sehingga penentuan sampel didasarkan pada karakter dan profil responden.”. NAMUN belum dijelaskan indicator Karakter dan Profil Responden yang dijadikan sampel, (halaman 12). Sementara itu di hasil penelitian ternyata karakter responden ciri2 nya bersifat umum. Dear Author(s),

We have received your article entitled "Employee Satisfaction Factors at E-commerce industry: The Mediating Role of Employee Engagement". However, we found out that your article's Turnitin (similarity/plagiarism detector) result is 42% (which is beyond JIEB's standard), and we decided that we could not process your article for our journal.

The limit for Turnitin results in JIEB is 25%. We suggest you rewrite and re-paraphrase the paper so that the Turnitin result will be less than 25%.

For your information, We usually would exclude bibliographic materials. However, Turnitin detected that more than 15% of the text in your paper is in the bibliography. Thus, we have to reinclude the bibliographic material in the article. Please rewrite your paper and ensure the bibliographic materials are no more than 15% of the overall text.

Thank you for being so interested in submitting your manuscript to our journal.
We wish you the best of luck in your future.

Best regards,

Submissions
